

NCR RealPOS™ 5982 LCD Display

Compact and
Powerful with
full color graphics

- Small-footprint Operator Display
- Promotional Customer Information Display
- Flexible Configurations

Designed with a small footprint and ergonomic packaging to maximize space and usability, retailers can use the NCR RealPOS 5982 LCD display either as an operator or customer information (CID) display. The display provides a clean, clear screen designed to be easy to see and read. The NCR RealPOS 5982 LCD display complements your total point-of-service solution.

Improved Customer Service

Unlike 2x20 or smaller operator displays, the NCR RealPOS 5982 offers a full color, bright LCD display. This user-friendly display is simpler for associates to navigate enabling them to focus on the customer rather than on translating a message on a small screen. Additionally, the full color can be used to highlight special messages or draw the eye to the appropriate function.

Informed Customers

Making it simpler for your customers to see pricing, promotions and other items of interest can enhance your communications and customer satisfaction. The full color LCD display offers a vivid screen that makes it easy to see and read. The display can feature product advertisements, information on upcoming events and promotions, or even an overview of items in an upcoming sale.

Flexible Configurations

The NCR RealPOS 5982 LCD display features flexible configurations that suit almost any retail environment. With the ability to connect into the NCR RealPOS 5932 64-key POS keyboard, retailers can use the NCR RealPOS 5982 LCD display as an operator display. Additionally, retailers can mount it on the NCR RealPOS 70 as an integrated customer display.

To complement your store décor, the NCR RealPOS 5982 display is available in beige when used as an operator display or charcoal gray when used with the NCR RealPOS 70.

NCR RealPOS™ 5982 LCD Display

Designed for Retail

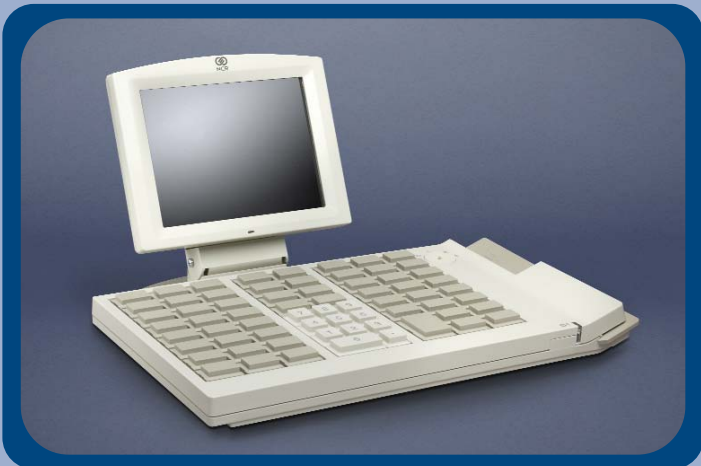

All NCR RealPOS peripherals are certified with NCR RealPOS workstations to ensure a stable platform and eliminate potential conflicts. In addition, our displays support both OPOS and JavaPOS drivers to simplify application integration and minimize ongoing support costs.
